# COMPANY OVERVIEW

## About Milestone HVAC Solutions

Milestone HVAC Solutions is a specialist HVAC division of Milestone Global, a diversified engineering, construction, mining, logistics and industrial solutions group established in 2021.

The company delivers professional heating, ventilation, and air conditioning services supporting commercial property portfolios, industrial facilities, business parks, and managed real estate assets across South Africa.

Our approach combines engineering discipline with practical execution - ensuring HVAC systems operate efficiently, safely, and consistently throughout their lifecycle.

## A Division of Milestone Global

Milestone Global operates as a multi-disciplinary engineering and industrial services group providing:

- Mining and mineral processing support
- Logistics and operational services
- Electrical and mechanical engineering
- Energy and infrastructure solutions
- Civil and general building works
- Industrial procurement and supply

## Our Core HVAC Services

Milestone HVAC Solutions delivers end-to-end heating, ventilation, and air conditioning services tailored to commercial, industrial, and residential environments across South Africa. Our services support the full HVAC lifecycle, from system design and installation to preventative maintenance, performance optimisation, and emergency response.

# LEADERSHIP & OPERATIONS

## Founder & Chief Executive Officer

Anzatshilidzi Khorombi is the Founder and Chief Executive Officer of Milestone Global, a diversified engineering, mining, construction and industrial solutions group established in 2021.

A qualified Technical Metallurgical Engineer, he brings extensive experience in coal processing, plant operations, metallurgical optimisation, process troubleshooting, stockyard management, logistics coordination, and production environments.

He completed the Operations Management Programme through the University of Cape Town and is currently pursuing a Postgraduate Diploma in Business Administration (PGDBA) at the University of the Witwatersrand.

Under his leadership, Milestone Global has grown into a trusted multi-disciplinary engineering partner delivering mining services, logistics solutions, electrical and mechanical services, construction capability, and industrial support solutions.

### Leadership Philosophy

“Vision without execution is hallucination.” — Thomas Edison  
“The best way to predict the future is to create it.” — Peter Drucker

## Built for Long-Term Partnerships

Milestone HVAC Solutions works alongside property owners, developers, facility managers, and commercial tenants seeking dependable HVAC partners capable of supporting operational environments over the long term.

Our operating philosophy prioritises:

- System reliability
- Preventative planning
- Compliance assurance
- Energy efficiency
- Asset lifecycle performance

Every building is treated as an operating asset rather than a once-off project.

# HVAC SERVICES

## Commercial HVAC Installations

We design, supply, and install HVAC systems engineered around building usage, occupancy requirements, and energy efficiency objectives.

Every installation is completed in accordance with OEM manufacturer standards, SABS compliance requirements, and South African HVAC regulations.

Milestone HVAC supports office parks, retail centres, industrial facilities, healthcare environments, and multi-site property portfolios requiring reliable climate control infrastructure.

## Preventative Maintenance & Asset Management

Planned maintenance programmes minimise breakdown risk, extend equipment lifespan, and improve system efficiency while maintaining regulatory compliance.

## Repairs & 24/7 Emergency HVAC Response

Milestone HVAC provides rapid-response repair services supported by experienced technical teams focused on restoring operational continuity.

## Specialised HVAC Solutions

Modern buildings require intelligent environmental control systems that go beyond traditional air conditioning, supporting data centres, healthcare facilities, and technical environments.

# OUR PROJECTS & CLIENTS

## Supporting South Africa's Commercial Property Assets

Milestone HVAC Solutions delivers HVAC installation, maintenance, and technical support across commercial properties managed by leading real estate advisory and property management group Excellerate JHI.

Milestone HVAC is an approved HVAC contractor supporting business parks, shopping centres, office developments, and managed commercial property assets forming part of Excellerate JHI's national portfolio of over 200 properties in South Africa.

Working within professionally managed property environments requires consistent service delivery, rapid response capability, and strict compliance standards - principles that define Milestone HVAC's operational philosophy.

## Portfolio-Based HVAC Service Delivery

Rather than isolated installations, Milestone HVAC operates within a portfolio environment where consistency, response time, compliance, and operational reliability are critical.

Our work supports:

- Commercial business parks
- Shopping centres and retail facilities
- Office developments
- Multi-tenant commercial properties
- Managed corporate environments
- Academic and Educational Institutions

HVAC systems within these environments must operate continuously to ensure tenant comfort, asset preservation, and uninterrupted business operations.

# COMPLIANCE & CERTIFICATIONS
